*What you missed at our last meeting  
and what's coming up!*

Notes from our October 25th meeting

**After dinner and introduction of guests, we heard from member Jamie Hunsdale, who works with Impossible Acoustic.**

We had an introduction to “post audio” and what happens in a recording studio when producing film, TV, commercials, corporate videos, games, and VR. We learned about different types of audio including dialogue, foley, sound design, music and mixing. Foley is Jamie’s specialty. This is the process of recording physical movement sound like footsteps, cloth, props, and designed items. It’s the glue between real and what we accept as real. Sound is noise without meaning. Sound design is not about cool sounds, it’s about the story. It was fascinating learning about what goes into this and how much time it takes to make is so seamless to the listener. To learn more about this process, talk to our fellow NCC member Jamie sometime.

**Minutes were approved.** (*Minutes submitted by Debbi Larson of Skagit Bank*)
